Diabetes Educator Mentorship Program

Mentor Application Packet

*People come in and go out of our lives all the time. Some of these relationships help us grow, and through them, we learn personal and professional lessons of life. Special relationships provide a catalyst for our transformation as individuals and help us grow, open windows to new capabilities, and create new ways of interacting with the world around us. These relationships constitute the reciprocal, interactive process of learning that connects us so we can reach our goals and grow together.**

Mentor Application	1

Introduction

Thank you for your interest in learning more about the Diabetes Educator Mentorship Program (Program), a program originally developed by a coalition of organizations. The organizations -- The National Certification Board for Diabetes Educators (NCBDE), the American Association of Diabetes Educators (AADE) and the American Diabetes Association (ADA) created the program to promote careers that will lead to a Certified Diabetes Educator® (CDE®) designation and improve access to much needed diabetes education (DE).

The Program partners experienced CDE®-credentialed diabetes educators with health professionals who are interested in gaining experience in providing diabetes education. The goal is to assist these professionals with meeting the current hours of experience practice requirement for CDE® certification. It is administered by the NCBDE.

The following statements* were included on the initial news release in November 2010:

“There are more than 23** million people in the United States who have diabetes. The national price tag for diabetes is at an astounding \$174 billion per year and that cost is estimated to almost triple in the next 25 years. Factoring in the additional costs of undiagnosed diabetes, pre-diabetes, and gestational diabetes brings the total cost of diabetes to \$218 billion.” said David Randal, PsyD, LP, CDE®, 2010 NCBDE Board of Directors Chair. “By 2025, it is estimated that more than 40 million will have the disease. To help people with diabetes maintain and improve the quality of their lives, it is critical that we dramatically increase the number of qualified healthcare professionals who provide diabetes self-management education.”*

“We are pleased to be part of this mentorship program because it seeks to promote careers in diabetes education,” said Deborah Fillman, MS, RD, LD, CDE®, 2010 AADE President. “Diabetes education is the key to helping patients successfully manage their diabetes, prevent and manage complications, and maintain optimum health.”*

“Diabetes is a growing epidemic and is taking a devastating physical, emotional and financial toll on our country. With recently released research from the Centers for Disease Control and Prevention estimating one in three Americans will have diabetes by the year 2050, we must continue to ensure that there will be enough, qualified health care professionals to successfully help patients manage their diabetes,” said Christine T. Tobin, RN, CDE®, 2010 President Health Care & Education, American Diabetes Association. “This new mentorship program will work to increase the number of Certified Diabetes Educators available to people with diabetes and ensure they have access to life-saving diabetes self-management education.”*

*Reference: New Mentorship Program to Increase Number of Certified Diabetes Educators; Improve Access to Diabetes Self-Management Education, news release “dated November 2010.

**Per the Centers for Disease Control and Prevention 2011 National Diabetes Fact Sheet, the number is now estimated to be 25.8 million people (February 2, 2011) - <http://www.cdc.gov/diabetes/pubs/estimates11.htm#1>.

Program Criteria

Mentor Eligibility Criteria

- CDE®, in good standing, for 3 years
- Current practice as a Diabetes Educator, providing DE services
- Other preceptor/mentoring experience
- Verify that DE provided includes*:
 - a process to coordinate educational activities
 - the individual's learning needs and goals
 - a curriculum (appropriate diabetes content areas, learning objective, methods of instruction delivery and methods for learning evaluation)
 - documentation of the educational activities
 - communication to the individual's primary care provider and/or the referring provider
 - regular assessment of the needs of your community and changes made based upon those needs
 - regular evaluation of the educational effectiveness and outcomes with results used to make changes in the educational activities
- Agree to complete and submit appropriate Mentor/Mentee monitoring documentation

* Additional information may be requested for any application and is required if the application is chosen for audit. Random audits will be conducted. In addition, applications can be audited for any reason. If an application is chosen for audit, the practice's diabetes education curriculum and other documentation verifying components of DE as identified above will be required.

Mentee Eligibility Criteria

- Meet NCBDE discipline requirements in effect at the time of application
- Volunteer hours must be accrued within a maximum 4 year period immediately prior to applying for certification
- Provide DE volunteer hours under guidance of NCBDE Mentor

What is Mentoring?

Terms utilized when discussing mentoring:

- Mentor / Mentee refers to the individuals involved
- Mentoring / Mentorship refers to the actual process

Considerable debate surrounds the concept of mentoring and the term mentor has been associated with related terms such as counselor, advisor, assessor and supervisor. Mentoring is more than a professional association and should also include developing a personal rapport with your mentee.

One usually charts unfamiliar territory when attempting to define "mentoring." Mentoring is not a term that is easy to define because it is an ever-changing process. The mentoring process links an experienced person (mentor) with a less experienced person (mentee) to help foster the career development and professional growth of the mentee.

The mentoring process requires that the mentor and mentee work together to reach specific goals and to provide each other with sufficient feedback to ensure that the goals are reached. Mentoring can be described as a process by which you open a passageway to knowledge by sharing ideas and information.

What is a Mentor?

Many define a mentor as a teacher who assigns tasks and reviews performance, but a mentor is more than a teacher. A mentor facilitates personal and professional growth in an individual by sharing the knowledge and insights that have been learned through the years. The desire to want to share these "life experiences" is characteristic of a successful mentor.

Some Characteristics of a Successful Mentor

- Wants to mentor another individual and is committed to the mentee's growth and development.
- Maintains current, up-to-date knowledge and the skills necessary to effectively perform as a mentor of an individual interested in becoming a Certified Diabetes Educator®.
- Familiar with the organization's norms and culture. Can articulate and teach the culture.
- Has the time and mental energy to devote to the relationship.
- Demonstrates honesty, integrity, and both respect for and responsibility for stewardship.
- Demonstrates effective communication skills both verbally and nonverbally.
- Willing to help develop the mentee through guidance, feedback, and occasionally, an insistence on a particular level of performance or appropriate direction.
- Initiates new ideas and fosters the mentee's willingness and ability to make changes in his or her performance based on the constant change occurring in the health care environment.
- Has enough emotional intelligence to be aware of their personal emotions and is sensitive to the emotions and feelings of their mentee.
- Is an individual who would be rated as "highly successful" in both their role and in navigating the organization's culture by coworkers and supervisors.
- Demonstrates success in establishing and maintaining professional networks and relationships, both online and offline.
- Willing to communicate failures as well as successes to the mentee.
- Able to spend an appropriate amount of time with the mentee.
- Open to spending time with diverse individuals who may not share a common background.
- Able to say when the relationship is not working and back away appropriately without regard to ego issues or the need to assign blame about the situation.

Mentor's Responsibilities

Relationship – It is highly recommended that a Mentor plan to work with only one mentee at a time. Maintaining a 1:1 mentoring partnership will help ensure the quality of the experience for the mentee and prevent an overload situation for the Mentor.

Orientation – Each mentee must be provided with an orientation to the diabetes program and, depending upon the size of the organization, a separate orientation for the facility may be required.

Learning Process - Coordinate and structure the learning process to provide experience in diabetes education according to the DE definition and standards. This will likely involve developing an Individual Development Plan (IDP). This document is developed by the mentee with the assistance of the mentor. The mentoring pair should identify strengths, developmental needs, activities, and track the mentees' progress throughout the mentoring relationship. NCBDE hopes that the IDP will be developed in conjunction with the current Examination Content Outline (Outline). Assessing the mentee's areas of strength and weakness in relation to the Outline will help the IDP reflect the priorities needed to provide the mentee with applicable experience. The goal is to address as many areas of the Outline as possible during a mentee's time working under the Mentor. The mentoring pair should review the IDP periodically and continue to work through stated objectives, making changes as needed.

Resources: Provide appropriate resources to facilitate learning, professional growth and role socialization.

Feedback: Provide periodic performance feedback (progress reports) to the candidate.

Documentation: Complete and return Program reports and surveys to NCBDE as required.

Documentation

Mentoring Progress Report - In order to ensure effective mentor/mentee relationships, NCBDE will monitor the progress of the mentoring pairs and will gather feedback about the program from participants. The goal is to ensure that the relationship is mutually beneficial and to detect potential issues as early as possible. The timing of these reports is still being determined, but attempts will be made to minimize the time needed to submit reports.

Partnership Completion Survey - To evaluate the Program's overall effectiveness, participants will be asked to assess the program once a mentee has completed the hours providing diabetes education. This completion survey will help to determine if the partnership was successful. Evaluation is important in measuring the mentoring relationship's success, as well as the overall Program's success. NCBDE staff will provide the survey after completion of a mentorship partnership.

What are the benefits of becoming a Mentor in NCBDE's Program?

For the Mentor

- Formal recognition of your status as a Mentor by NCBDE (e.g., certificate and identification on NCBDE web site)
- Provides an opportunity for professional development
- Provides an avenue to build relationships and network with other diabetes educators and other health care professionals caring for individuals with diabetes
- Encourages you to maintain an up to date knowledge level and to keep your skills sharp
- Provides possible employment opportunities by expanding your skills and experiences
- May improve your retention rate for those mentees who are hired to serve as diabetes educators
- May improve your ability to recruit highly motivated individuals to your practice/organization
- May increase the amount of successful cross-training in your program
- Possible future recognition of your program by accrediting bodies as being a program where CDEs are "made" (in development at this time)
- Successful mentees who become CDEs will increase access to diabetes education (both in terms of numbers and quality of education provided)

- 10 CEs can be claimed for each completed partnership (maximum of 3 mentees: 30 CE hours if only utilizing this non-formal category) within your 5 year accrual cycle providing proper documentation has been submitted to NCBDE. Details can be found at this link: https://www.ncbde.org/assets/1/7/RenewalGuidelinesExpDoc_final.pdf
- Additional benefits will be considered and developed by NCBDE, as feasible.

For the Mentor's Organization

- Provides recognition/visibility of their mentor employee and the program
- Possible extension of the amount of diabetes education that can be provided without the full cost of additional staff
- Provides a recruitment advantage, by allowing exposure to a mentee's fit within the organization prior to any consideration of employment.
- Ensures the employee serving as a Mentor maintains an up to date knowledge and skill level.
- Additional benefits may evolve, including possible development by the American Association of Diabetes Educators and American Diabetes Association, NCBDE's partners in creating the mentorship program, of on-line continuing education courses that would revolve around mentoring and that might be provided for those serving as mentors at no fee.

Final Comment

We appreciate your interest in the possibility of serving as a Mentor in the Program. If after reviewing the information in this packet, you wish to pursue participation, please discuss the Program with your supervisor and any other individuals at your organization that need to be aware of your intentions to apply for service as a Mentor to ensure the organization's permission to serve in this role if assigned a mentee. Once you know that you will be able to serve as a Mentor and bring an individual into the organization in a volunteer capacity, please complete and submit the application.

If after reviewing the packet, you feel now is not the right time for you to apply/serve as a Mentor, we hope you will consider spreading the word to other CDEs in your area about the Program.

Acknowledgments

The information used in creation of this packet was derived from numerous sources including the Department of Health and Human Services Mentoring Program, Blood Matters Breakthrough Collaborative Mentor Information Packet, USDOT Mentor Handbook, and various web resources including about.com.

Mentor Criteria (all must be met at the time of application) – please review the criteria and provide your initials verifying the requirement has been met.

Initials	Criteria
_____ Yes	I am currently a CDE®.
_____ Yes	I have held the CDE® credential for at least 3 years.
_____ Yes	I currently practice as a diabetes educator and provide diabetes education (DE) services.
_____ Yes	I have other mentoring/preceptor experience. Please provide a description of this experience, including dates. <i>Provide information on separate sheet of paper if additional space is needed.</i>
_____ Yes*	My practice is currently accredited by the Centers for Medicare and Medicaid Services, e.g., American Diabetes Association’s recognition program or American Association of Diabetes Educators accreditation. *For those answering “yes” to the above statement, please identify the accrediting organization in the space below and the date of accreditation.
_____ No**	**For those answering “no” to the above statement review and complete the questions below. **Note – this item is only for those whose practice is NOT currently accredited by the Centers for Medicare and Medicaid Services, e.g., American Diabetes Association’s recognition program or American Association of Diabetes Educators accreditation. You must be able to respond ‘yes’ to each of the following questions for the DE offered in your setting and you may be subject to an audit requiring additional materials. Do you: <ul style="list-style-type: none"> _____ Yes** 1. Have a process in place to coordinate educational activities? _____ Yes** 2. Include the individual’s learning needs and goals? _____ Yes** 3. Have a curriculum that guides the education? (appropriate diabetes content areas, learning objectives, methods of instruction delivery and methods for learning evaluation) _____ Yes** 4. Document the educational activities? _____ Yes** 5. Communicate to the individual’s primary care provider and/or the referring provider? _____ Yes** 6. Regularly assess the needs of your community and make changes based upon those needs? _____ Yes** 7. Regularly evaluate the educational effectiveness and outcomes and are the results used to make changes in the educational activities?

Name _____

Mentor Criteria (continued) (all must be met at the time of application) – please review the criteria and provide your initials verifying the requirement has been met.

Initials	Criteria
_____ Yes	I agree to complete and submit appropriate mentor/mentee monitoring documentation by the identified deadlines.
_____ Yes	I agree that NCBDE may rely on the accuracy of the representations made herein. I agree that NCBDE shall not be responsible for my actions or inactions and/or for the actions or inactions of my organization and/or the mentee. My organization and I are responsible for verifying the credentials/licensure requirements of any mentee. NCBDE is not responsible for verifying the credentials/licensure requirements of any mentee.

I have reviewed the Mentor Application packet, understand the requirements, and attest that our practice/organization has approved the Applicant's participation as a Mentor in the Diabetes Educator Mentorship Program.
